

Decision Making and Service Consent Policy

Scope

This policy applies to Brook RED Community Members, Nominated Support People, Board Members, employees, volunteers, and students on placement.

Purpose

To provide guidelines around how Brook RED supports individual informed decision-making and consenting to deliver services.

Principles

Brook RED believes that informed choice and decision making is central to being an active participant in our own lives. People have the right to make decision about things that affect their lives and to take calculated risks. Brook RED adopts a 'nothing about you, without you' attitude when working with Community Members where possible. We work at all times to maximise individual decision making opportunities and capacity.

Policy

Brook RED will seek consent from people who access our supports and services to ensure they are fully informed of their rights and our obligations with regard to service delivery and service usage. Each Community Member will have sufficient time to consider and review their options and seek advice if required, at any stage of support provision. Each Community Member has the right to withdraw or amend their consent if they wish.

We will:

- Encourage and support Community Members to make informed decisions when their consent is required
- Record consent arrangements including any legal authorisations required, in the Community Member's file, and review and update these
- Obtain consent from the Community Member prior to collecting, using, and storing a Community Member's information and provide reasons why the information is needed
- Obtain consent before disclosing any of a Community Member's personal information (such as notes, plans, or assessments) to other parties
- Only disclose Community Member's information without consent if we believe the person is at risk of harm, an unlawful act has occurred, or otherwise as required by law
- Not influence or limit decision making and self-determination without interest, beliefs, or values when providing decision making support

How we obtain consent:

- Prior to provision of a service, consent from a Community Member or a substitute decision maker should always be in writing but if this is not practicable, verbal consent is acceptable providing it is later confirmed in writing

When consent is refused:

- A note of a Community Member's refusal to consent for services must be stored in their file

Decision Making and Service Consent Policy

- Brook RED may not be able to deliver a service where it is not consented to. Consent may later be given for services and any previous refusal of consent will not impact on future service delivery

Types of Decision Making

Autonomous decision making

- For Community Members with the capacity to make their own choices without support, all decisions must be referred to them
- Community Members with the capacity to make their own choices can talk to family or friends, or carry out their own research before making any decisions
- Community Members are supported to make informed choices about the benefits and risks of decision under consideration
- Community Members that need help to make decisions and give consent will be supported in ways that best suits the individual (as available). For example arranging an interpreter, supporter or advocate, getting information, communication tools, or arranging a certain time or place that best supports the person

Substitute decision makers

- If there is uncertainty over who can provide consent when a Community Member with an impaired decision-making capacity requires it, the order of priority is:
 - a. a guardian (including an enduring, private or public guardian) who has been appointed with a medical and dental consent function
 - b. a spouse, de facto spouse, or partner who has a close and continuing relationship with the person
 - c. the Nominated Support Person or person who arranges care regularly and is unpaid (the carer's pension does not count as payment)
 - d. a close friend or relative
- If a person above is not capable of consenting for the Community Member, or they refuse to consent, the next person in the hierarchy can consent
- If we think it is in a Community Member's best interest to get help from a substitute decision maker, we will:
 - Explain to the Community Member why we think someone needs to make a decision for them
 - Where appropriate we may engage QCAT to look at whether or not to appoint a guardian or administrator
